(54) Title: METHOD FOR ESTABLISHING A DEFAULT CONNECTION IN A NETWORK, AND ASSOCIATED SOURCE AND SINK DEVICES

(57) **Abstract:** A sink device (CED-A, CED-D) for connection to a digital network (100) comprising means for displaying (102, 211) a user interface for controlling a data source device (CED-B; CED-C) connected to the network; characterized by: means for controlling (104, 214-216) network resource allocation and for automatically establishing, upon selection (212, 213) of a function of the source device by the user through the user interface, a connection between the data source device and the data sink device as default destination device of the connection, wherein said sink device has playback capability of the data of the source device.
